

Conference Management Tool (CMT)

Demo Presentation Flow & Login Guide — LJ University

1. Demo Login Credentials

Role	Name	Username	Password
Admin	Dr. Rajesh Patel	admin	admin123
Coordinator	Prof. Neha Shah	coordinator	coordinator123
Author	Aarav Mehta	author	author123
Other Authors	Riya Shah, Harsh Patel, etc.	riya.shah / harsh.patel / ...	demo123
Dept. Coordinators	Auto-assigned faculty	(see Django admin)	coord123

2. Login & Dashboard Routing

Go to **/login/** (or click 'Login' in the navbar). After signing in, the app automatically redirects you based on your profile role:

- **Admin** or superuser → **/dashboard/admin/**
- **Coordinator** → **/dashboard/coordinator/**
- Everyone else (**Author**) → **/dashboard/author/**

New user registration: go to **/register/**, fill in username, email, password, and choose a role (Author/Participant or Department Coordinator). Newly registered coordinators have no department assigned by default — assign one via Django admin (**/admin/**, login as admin) for a fuller dashboard.

3. Full Demo Presentation Flow (~30 minutes)

Follow this order to demonstrate the complete workflow: Visitor → Author → Coordinator → Admin.

Step 1: Homepage (no login)

<http://127.0.0.1:8000/>

Show the hero section, platform stats, Upcoming/Current/Past conference cards, department cards, and materials teaser. Conference categorisation is dynamic, based on today's date — not hardcoded.

Step 2: Browse & filter conferences

</conferences/>

Show filters: All/Upcoming/Current/Past, department dropdown, and search. Open a conference detail page — show tabs (Overview, Schedule, Call for Papers, Materials), the conference code badge, ■ fee, and Download Brochure/Flyer buttons.

Step 3: Register & pay as an Author

Login: [author / author123](#)

Open a conference detail page → 'Register Now'. Fill Participant Type, Phone, Institution, City, State → Submit. You're redirected to the demo Payment page → 'Pay Now' → shows the printable receipt with Registration ID (REG-2026-xxxxx) and Transaction ID (TXN-2026-xxxxxx).

Step 4: Submit a paper

Navbar → [Submit Paper](#)

Shows the Author Information card (auto-filled from profile), then Paper Information: conference, title, abstract, keywords, presentation type (Paper/Poster), PDF upload. On submit, shows the auto-generated Abstract ID (e.g. CMT-2026-00012) with status 'Submitted'.

Step 5: Track submission as Author

My Submissions

Shows the status badge (Submitted / Under Review / Accepted / Rejected / Revision Required); open the submission detail page.

Step 6: Review as Coordinator

Login: coordinator / coordinator123

Dashboard shows stats and charts. Go to Submissions → search/filter by Abstract ID, conference, status → open one → change status and add a remark → this notifies the author.

Step 7: Admin overview & reports

Login: admin / admin123

Admin Dashboard shows totals (conferences, submissions, registrations, revenue) plus Department and Submission-status charts. Then Reports → Conference/Submission/Registration/Payment report cards with CSV export and print.

Step 8: Wrap up (optional)

/admin/

Briefly show Django admin — departments, conferences, materials — to prove the backend is fully model-driven, not hardcoded.

4. Timing Guide

Segment	Steps	Suggested time
Visitor → Author flow	1 – 5	~10 minutes
Coordinator review	6	~7 minutes
Admin overview & reports	7	~8 minutes
Buffer / questions	—	~5 minutes

Tip: if short on time, skip Step 8 (Django admin) — it's optional polish, not part of the core requirement workflow.
